Our Technology

those who have the right technology in place win the race
In-house PMS

After 25+yrs of experience, we developed our own localization project management system that take care of every little details of our project workflow and allow our PMs to plan projects ahead and automate processes

Custom Translation Engines

We have trained many translation engines for certain subject matters such as life science, legal, medical ..etc for a few language pairs and we are working to extend our resources to support more language

Translation Management System

We're proud to have our own CAT tool "TMS" which helps us deliver projects in a faster time with the highest possible quality, it retrieves project-specific translation memories and glossaries, and assign translators, reviewers, proofreaders and the rest of the translation team.

Our Technology

those who have the right technology in place win the race
In-house RMS

Our resource management system is the backbone of our business, it forces work procedures to ensure every resource added to the system is vetted and passed the onboarding phases, It also allow our teams to rate, evaluate and segment resources based on subject matters and previous feedback of PMs

Integration with 3rd parties

Whenever required to integrate with any other solutions on the market, we have a team of localization engineers who take care of complex integration

Latest Localization Tools

Our DTPiers & localizers are professionals and up to date with the industry technologies, we have talents who can manage subtitling, screen edit, dubbing, files conversions, video & audio editing tools in both Mac and Windows operating systems

DLA Piper

9 **And much more ..**
Biochemical, Automotive
Environment, Safety, Military,
Agriculture,

Resources Management

Our RMS maintains all our resource data, capabilities, production rates and prices, work schedules, task progress and evaluation records in one easy to use interface. Hence it facilitates the process of selecting the most appropriate resources for each task, based on their capability, availability and achievement record.

LOCAL, NATIVE TALENTS

It's not an option, our resources are not only natives but also have a BSC in languages studies and they only translate to their mother-home language

VETTED & TESTED & TRAINED

Our Global Front Line (GFL) sets strict criteria to add a resource to our pool, including verifying their certificates, work references, passing a test and attending our video training course

GAMIFICATION

When the work is fun, quality is done. Our resources receive badges and incentives when they outperform and deliver good experience to our clients, we beleive this is a quality driver

Contentech
