ABOUT US

In the ever-changing field of localization, Middle Eastern experts Loc & More have always had a keen eye on the entertainment industry. With demand and market needs skyrocketing in the past few years, it only made sense to completely separate the video game localization department and develop an entirely new and refined entity, solely responsible for localizing the games that bring joy all over the world; hence Loc & Play was born.

PROJECTS

We have worked on numerous video games of different genres and platforms. We've also worked on games by some of the biggest studios in the gaming industry.

Among our most famous examples is the award-winning RPG, *The Witcher 3: Wild Hunt*, for which IGN awarded us its **People's Choice Award** for 2015's **Best Localized Game**.

SERVICES

Loc & Play offers a wide array of services, including **Translation**, **Initial Testing**, **Full Localization Testing** and **Voice Overs**. These are specifically tailored for the game development and marketing process. With many years and games in our arsenal of experience, we are able to guarantee our clients in the game development industry the finest quality as well as the highest level of efficiency at every stage of the process.
