“ Thank you for your help and efficiency. I was given some ridiculous quotes when I first started looking and whilst grateful that yours was cheaper and I liked the tone of your first re:mail, I was concerned that perhaps the type of work we do may be a real challenge to someone who had not worked in the world of H&S. I will definitely recommend your business to anyone else who needs this sort of help and if there is anywhere I can put my comments on your website please let me know.”
