## COMMENTS

---

### In linguistic field

I work as a freelance translator because I like this kind of work and it's enjoyable and I believe it will expand my world and will bring me new opportunities in life. During my MS thesis I started to work on academic texts and articles for scientific journals, and afterwards I have worked on industrial and petroleum texts and standards.

### Objectives

---

An enjoyable and desirable job or line of work will improve the quality of life and help us improve and grow, that's what I believe and that's why I want to work as a freelancer and I hope my work will help people and contribute to the world.
