Experience

Translation Office 960 of Tehran
Assistant Translator
January 2019 - Present (1 year 4 months)
Tehran Province, Iran

Self-Employed
Freelance Tourist Guide
September 2015 - Present (4 years 8 months)
Tehran Province, Iran

Code.org
Code Teacher
January 2016 - Present (4 years 4 months)
Tehran,Iran

I Inspire my students to try computer science and learn how to code, The first
step to introducing children to how to code is the Hour of Code.
The goal of the Hour of Code is not to teach anybody to become an expert
computer scientist in one hour. One hour is only enough to learn that computer
science is fun and creative, that it is accessible at all ages, for all students,
regardless of background.
By the end of this course, students create their very own custom game or story
that they can share.

Institute for the Intellectual Development of Children and Young Adults (IIDCYA)
Computer Science Teacher
June 2016 - August 2016 (3 months)
Tehran,Iran

I'm preparing a group of children for their future about what technologies will be invented and what the world is going to be based on Moore's law by teaching them how to program a computer or how to code; because it makes their mind computational and teaches them how to think.
This is a global plan that Code organization started and has inspired many students successfully, all the curriculum that is teaching by me is powered by Code.org
