

DANIEL GUEVARRA JR

TRANSLATOR AND WEB DEVELOPER

About Me

As a translator, I involve in converting written or spoken material from one language into another while maintaining the original meaning, context, and style. I need to have a deep understanding of both languages, cultural nuances, and often specialize in specific fields such as legal, medical, technical, religious, or literary translation. The need of attention to detail, linguistic accuracy, and the ability to convey the intended message faithfully is a must for me. As a web developer, I involve in designing and creating websites. I use programming languages like HTML, CSS, and JavaScript to build the layout, appearance, and functionality of web pages. I also integrate databases and server-side technologies to enable dynamic content and interactive features on websites.
