A FEW WORDS ABOUT ME

Native speaker of Italian. B.A. in translation studies and M.A. in localization.

Before launching my freelance translation business, I worked in the measuring instruments industry, gaining experience in Quality Assurance, Product Certification and Marketing, and developing a strong background in technical and corporate terminology.

In **2018** I decided to **broaden my professional horizons**. I enrolled in a **Master's degree** in translation of software and multimedia products at ISTRAD in Seville. After the master and a traineeship at Qabiria, a translation agency based in Barcelona, I turned my career around: I became a regular contributor at Qabiria, I found new customers and in **2020** I left my permanent position to become a **full-time freelance translator**.

In 2018 I founded **Bold Translations**, a small but thriving business, offering localization and translation services for both businesses and individuals.

I am passionate about technical writing, plain language and clear writing, and I am devoted to continuous professional education.

My complete profile is available on [LinkedIn](#).
