Work Experience

English – Pashto Interpreter

Alpha Language | Maryland, USA

My work enabled the recent refugees from Afghanistan residing in USA to remove the language barrier and made them able to convey their needs and problems to the officers/staff in the USA

- Worked for a total of 10,000 minutes
- Facilitated around 500 patients from Afghanistan to connect with medical experts in the USA
- Helped them establish good communication with lawyers in hopes of allocating their immigration status and applying for several benefits including Medicaid insurance, food stamps, and much more.,
